

Week of March. 21th

This week, I was discussing with my team about the project plan. Also, I wrote with my team the project planning paper.

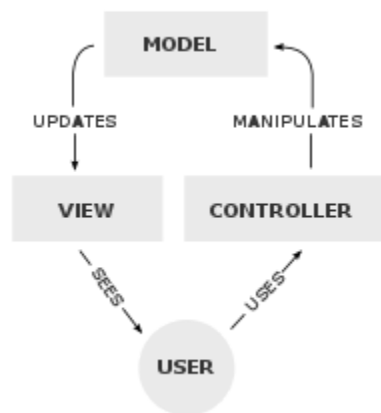

I analyze all usage scenarios when the user uses the app, and find the packages that I will use to develop the app.

Also, I was studying the software architectural pattern that we will use to develop the mobile phone application, and which one we will use MVVM or MVC.

MVVM

MVC
